

## Q Media Center Features

### World's most innovative and secure Peer-to-Peer, SIP based Communication, Conferencing and Real-Time Collaboration Tool.

#### Peer-to-peer connection with Personal SoftSwitch™

In peer-to-peer network (direct connection between the terminals) there is no need for intermediate servers or nodes, which provides the highest level of security, voice and video quality, reliability, and performance on IP –Networks. Personal softswitch also provides call-control intelligence for starting & terminating calls and sessions.

#### Open Standards Compliant

Open Standards (SIP) based Q Media Center solution is fully compatible with all Open Standard based Communication solutions like MSN, Yahoo, Google, AOL and FWD, and is therefore also future proof solution for all upcoming VoIP - features including Mobile Phone Clients.

#### Security

All audio/video calls and text messages are end-to-end encrypted including SIP signaling. No other commercial application can provide this kind of security. You are always in control with Q Media Center. It's up to you to invite or accept an invitation to add users to your contact list. Without a trusted relationship, no one can call you or send a message to you.

#### Superior Quality

Direct connection together with best available codecs is ensuring the superior call/video quality. Voice clarity is better than in PSTN networks and there is no latency (delay) like in traditionally connected and proprietary VoIP technologies. Peer-to-peer video is also in its own class. Try and see it!

#### ConnectAll™ Technology with Real-Time Presence

Patent-pending ConnctAll™ technology penetrates all NAT/PAT firewalls without any configuration. Q's intuitive easy to use User Interface is keeping you real time connected with all the contacts and information you need.

### Voice & Video over IP for seamlessly and the most cost effectively connecting people real time

#### Free Voice & Video Calling between Q Clients

Turn your PC as a phone or use other compatible IP Terminal for connecting your remote workers, business partners, or friends & family together and enjoy the great voice clarity for FREE. Speak as long as you like, it is always going to be free.

### **Peer-to-Peer Video**
